 ARC Foyer

21 Oct • 14:30 • Room 313

From development to deployment: scaling 4evergreen's digital tools

Explore how 4evergreen can maximise the uptake, visibility and impact of its digital tools, including the Circularity Assistant, PPWR Tracker and future Recyclability Assessment Tool.

21 Oct • 14:30 • Room 314

Strengthening the resilience of the 4evergreen Toolbox

Through real-world challenges and case studies, participants will assess how the 4evergreen Toolbox performs in practice, identify gaps between deliverables, and help define priorities for future improvements.

21 Oct • 16:00 • Room 314

Laboratory validation: improving reproducibility of test methods

Join the discussion on improving test method reliability through greater alignment and consistency across laboratories.

21 Oct • 16:00 • Room 313

Circularity by Design Guideline: what's changing and what's next?

An update on the Guideline's evolution, key improvements on the Design for Recycling tables, alignment with CEN and future direction.

21 Oct • 16:00 • ARC

From recyclability to reality: what AI is teaching us about paper-based packaging in sorting

Join Greyparrot and the Fibre Collective to discover how AI-powered sorting data is helping understand real-world performance of paper-based packaging in sorting facilities.

22 Oct • 09:15 • Room 314

Score2Table methodology: investigating first use cases

Review the first Score2Table use cases and explore how the methodology can help connect data, design and recyclability evaluation.

21 Oct • 09:15 • Room 313

Extended Producer Responsibility playbook: first results and insights

Explore the first findings from the EPR Playbook project and help shape the next phase of engagement with Producer Responsibility Organisations (PROs).
